GEBERIT DUOFRESH MODULE FRESH AIR FOR EVERYONE

FUNCTIONS AND SOLUTIONS

GEBERIT DUOFRESH MODULE ADVANTAGE

- EFFICIENT**
The air is purified by the ceramic honeycomb filter.
- QUIET**
A quiet fan conveys the purified air back into the room.
- ACCESSIBLE**
The ceramic honeycomb filter can be easily accessed via the actuator plate.
- COMPATIBLE WITH SIGMA RANGE**
The Geberit DuoFresh module can be easily installed in any Geberit Sigma cistern and can be combined with almost any actuator plate from Sigma range.

UNPLEASANT ODOURS IN THE TOILET ARE A THING OF THE PAST
The Geberit DuoFresh module removes the bad air directly from the WC ceramic appliance, purifies it using a ceramic honeycomb filter and then returns it to the room. This is extremely effective, as it prevents unpleasant odours from spreading throughout the bathrooms in the first place, rendering air fresheners, lighting matches, opening windows, etc. completely unnecessary.

It doesn't get any simpler than this, pull the actuator plate aside.

The ceramic honeycomb filter can now be easily taken out or exchanged.

GEBERIT REMOTE FLUSH ACTUATIONS

PNEUMATIC SOLUTIONS

Free placement of pneumatic actuators upto 2m away from the cistern offers new planning possibilities.

TOUCHED A THOUSAND TIMES.

The pneumatics of the Geberit remote flush actuations type 01 and 10 have been tested for years of stress. The technology is based on air pressure (not on electrical current).

Not only with respect to placement in the room, but also in terms of product material, structure, form and colour, the Geberit remote flush actuations are very versatile. And furthermore, they can be combined with concealed cisterns of the Sigma, Omega and Alpha series.

GEBERIT SHOWER DRAINS

SIMPLY CLEAN

GEBERIT SHOWER DRAIN SOLUTIONS
CLEAR ADDED VALUE
 ADVANTAGES AT A GLANCE

There are good reasons to decide on a solution from Geberit for floor-even showers. Whether it involves a shower surface, wall drain, shower channel or floor drain, the assortment makes it possible to tailor the installation precisely to the building situation and the customer's wish. The greatest challenge-the caulking-is perfectly prepared because the sealing foil is already integrated at the factory, thus making it a permanent component of the product. This saves time and cuts stress during installation, and minimises the risk of leaks.

- FINE DESIGN FROM GEBERIT:**
- high-quality and beautiful
 - reliable thanks to injected sealing foil
 - simple handling from order to installation
 - integrated acoustic insulation
 - for new construction and renovations
 - lean assortment with rapid supply readiness
 - easy to clean

SIGNIFICANTLY EASIER INSTALLATION

Geberit shower channels CleanLine have a twopiece design: a collector surface in stainless steel forms the visible part. Below that is a central trap that is mounted exactly like a floor drain. Thanks to the sealing foil injected at the factory, this is firmly connected to the drain and ensures maximum tightness.

Flexible length and placement

Geberit shower channels CleanLine can be cut to length directly at the time of installation in accordance with the individual showering area. The design harmonises with any floor and can be placed either close to the wall or in the middle of the shower area.

Designed for simplicity and cleanliness

Shower channels are often difficult to clean. But not Geberit shower channels CleanLine: the dirt flows off the collector surface perfectly. And the comb insert can be removed and washed out in no time at all.

PROBLEM-FREE INSTALLATION
The proven installation kit for the Geberit floor drain for shower is very efficient in installation and reliable in its result, e.g. thanks to the sealing foil that is already injected at the factory.

MAXIMUM REDUCTION AND PRECISION
The Geberit floor drain for shower convinces with its very compact construction (only 80 × 80 mm grating area) and with its very high functionality. The height, inclination and offset of the grating can be adjusted to suit the tile grid.

ALWAYS A CLEAN TRAP
Under the grating, there is an integrated comb insert which can be easily removed and washed out for cleaning. This effectively prevents clogging in the trap and the discharge pipes.

GEBERIT TAPS SYSTEM

SLIM AND CLEVER

SYSTEMATIC FUNCTION AND AESTHETICS

Wall-mounted taps are the sophisticated solution for public and semi-public sanitary facilities. As well as a more attractive aesthetic, they also offer more space for hand washing than conventional deck-mounted solutions and are therefore easier to clean, making them more hygienic in turn.

SLIM DESIGN THANKS TO CONCEALED TECHNOLOGY

- 1 Geberit washbasin tap Brenta, deck-mounted
- 2 Geberit washbasin tap Brenta, wall-mounted
- 3 Geberit washbasin tap Piave, deck-mounted
- 4 Geberit washbasin tap Piave, wall-mounted

In the past, it was the control technology which made many touchless taps larger and less elegant than conventional taps. Geberit's new tap system provides a superior solution to this problem.

FUNCTIONAL RELIABILITY

The Geberit tap system provides functional reliability, particularly in highly frequented areas. The tap housing is anchored firmly in the Geberit installation element and delicate components are separate from the tap, virtually eliminating the risk of damage due to moisture or vandalism.

GEBERIT URINAL SYSTEM

URINALS THAT LEAVE NO WISH UNANSWERED

INTEGRATED URINALS

↑
The control unit contains the IR-control, the power supply and the solenoid valve and is removed with one hand.

↑
The spray head is accessible from the front to facilitate cleaning or replacement

↑
You get a direct access to the drainage system.

SIMPLE
The compact control unit comprises the control itself, the power supply and the solenoid valve. This makes the execution of maintenance tasks quick and easy. The spray head is accessible from the front to facilitate cleaning or replacement. This saves time and money. The trap is easily accessible from above and the siphon can be quickly removed or replaced. The practical docking station enables easy access to the control unit at anytime.

MINIMAL WATER-CONSUMPTION
The spray-head has been precisely designed to fit the clever inner geometry of the ceramic pan. As a result, just 0.5 litres of water are enough to ensure an optimal flushing out.

WATERLESS URINALS

↑
A trap adapter opens the drainage access.

↑
The hybrid trap can be removed with a maintenance key.

HYBRID TRAP
While the suction trap is designed for standard flush volumes, the hybrid trap enables the full function even with low water volumes or for waterless operation.

WATER-SAVING CONCEPT
This product has been designed for application fields that require the maximum effort to save water or where the water-supply connection is simply missing.

NOTE: WATERLESS URINALS HAVE TO BE CLEANED REGULARLY. THE RIMLESS CERAMIC PANS FACILITATE CLEANING, IMPROVE HYGIENE AND PREVENT UNPLEASANT ODOURS.
